Summary

Senior Full-Stack Software Engineer with **7+ years of experience** building and owning production web and backend systems. Experienced across **Node.js/Express, React/Next.js**, cloud deployments (**AWS EC2, Amplify, Heroku**), and product-heavy platforms including **fintech partner integrations** and **AI/video creation tooling**. Strong end-to-end ownership: architecture, implementation, reliability, partner onboarding, and performance optimization.

Skills

- **Frontend:** React, Next.js, Vite, TypeScript/JavaScript, UI editors (canvas/drag-resize workflows), React Three Fiber
- **Backend:** Node.js, Express, REST APIs, third-party integrations, authentication, workflow prototyping (Node-RED)
- **Data/Infra:** MongoDB, Firebase, AWS (EC2, Amplify), Heroku, API Gateways (WSO2)
- **Product Domains:** Fintech payments & settlements, partner portals, chat commerce, AI content/video tooling, analytics
- **Architecture/Platform:** Multi-tenant isolation (provisioning per-tenant database schemas), embeddable widgets (injectable chat/support widgets), headless communication tools (social account/page integrations)

Selected Freelance Projects / Portfolio

- **Luxe Aura** — www.luxe-aura.shop

Compact e-commerce site (no payment integration). Built an admin dashboard that triggers order notifications; the shop owner follows up directly with buyers after orders are placed.

- **interpret.io (WIP)** — uat.interpret.io

ERD/diagram tooling using React Flow. Uses a Rust → WASM module to interpret diagrams and output ORM/ODM code in real time.

- **Emirady Design Registry** — emirady-design-registry.vercel.app

Custom shadow design registry to keep components and design tokens consistent across internal products and tools.

- **M3 E-commerce (staging)** — m3-client-staging.up.railway.app

Scalable e-commerce app built with NestJS and GraphQL.

Experience

X Inc (Japan) — Senior Full-Stack Software Engineer (Core Team Lead), “WriteVideo”

2024 – Present

Tech: **AWS Amplify, Next.js, React (Vite), Node.js/Express, AI (Stable Diffusion/AI-SD), React Three Fiber**

- Led and maintained the core engineering work for **WriteVideo**, an AI-powered text-to-video creation platform used for richer web-based storytelling.
- Helped the company pivot into AI video tooling by taking prototypes to production and stabilizing the core product workflows.
- Delivered performance improvements across the web app to support **regular user growth** and stronger reliability at scale.
- Built key product systems:
 - **2D canvas-style editor** and interactive UI tooling for layouts and creative assembly.
 - **Reusable layouts and materials CMS** to standardize content production and speed up creation.
 - **Video/audio recording + transcription** features for richer content creation and editing.

- **Real-time AI editing** for scripts and design content.
- **Analytics** to track video performance and user engagement.
- Supported product localization and delivery that helped the company **enter the Japanese market**.

AYA Innovation Labs (AYA Bank), Myanmar — Software Engineer (Partner Integrations / Platform Owner)

2022 – 2024

Tech: **Next.js, React, Node.js/Express, MongoDB, TypeScript/JavaScript, AWS EC2, WSO2, Node-RED**

- Owned third-party integration onboarding for the bank's APIs; helped onboard **50+ payment partners** for payment and wallet-related use cases.
- Built and maintained **partner portals** for reporting, operational support, and settlement visibility; improved **uptime** and usability through continuous maintenance and iteration.
- Maintained and operated the **WSO2 API Gateway** used for partner integrations (routing, security, traffic management).
- Owned and maintained a **Node-RED API application** to rapidly prototype and launch new third-party features supporting the **AYA Pay** wallet ecosystem.
- Worked closely with partners and internal stakeholders to troubleshoot integration issues and improve delivery speed.

BLife, Myanmar — Backend / Full-Stack Engineer

2019 – 2020

Tech: **Node.js, Express, Firebase, JavaScript, Heroku**

- Developed, owned, and maintained a **Node.js backend** powering the company's **Viber and Facebook Messenger chatbots**.
- Integrated chatbots with a core fintech API to enable in-chat **utility bill payments, mobile top-ups, and gift card purchases**, removing the need for a separate app.
- Built and maintained internal **CMS and management tools** for chatbot content, operations, and admin workflows.

- Supported business outcomes tied to **revenue and results supporting foreign investments** (fintech growth and commercial impact).
-

Education

B.Sc Hons Business IT, Greenwich University — 2019
